It is an "experimenter's journal" published by the ARRL, containing material
that is too technical for QST :)

Personally, I like QEX. Amateur radio without contest scores!

"QEX: ARRL Experimenter's Exchange" is published monthly by the ARRL.
Format: 8.5" x 11", about 20-30 pages (and soon to grow, I understand).
Content: Purely technical articles related to ham radio and communications.

Date: (null)

From: (null)

Purposes of QEX:

- 1) provide a medium for the exchange of ideas and information between Amateur Radio experimenters.
- 2) document advanced technical work in the Amateur Radio field.
- 3) support efforts to advance the state of the Amateur Radio art.

...

Both theoretical and practical technical articles are welcomed.

I highly recommend it if your interests are tehcnical.

Cost: \$12/yr for ARRL members; \$24/yr for nonmembers in the US. Higher in other countries.

Editor: Jon Bloom (jbloom@arrl.org).
